

RECRUITLAB

A simple, feature-rich recruitment software with CRM and ATS functionality build for the needs of recruitment agencies!

Does that look familiar?

01

A lot of time spent searching for the right candidate.

02

Searching across multiple resumes of different candidates to find the right one.

03

Browsing across a lot of Excel spreadsheets.

01

A highly organized and searchable database of your candidate's portfolio connected with all necessary files and information about the person.

02

Manage your assessments and assign potential candidates. Track their interview progress and be on top of the changes.

03

Track the performance and revenue of your team with clear targets and have an eye on live charts.

We have solution

There's more!

We build our CRM and ATS solution together with highly experienced recruiters and freelance headhunters. We know the areas where we have to focus the most to make your work successful!
